🐙 [github.com/kxkxkxq](https://github.com/kxkxkxq)

## EDUCATION

---

Moscow Institute of Physics and Technology, Dolgoprudny	<i>Septemder 2023 - Present</i>
Phystech School of Radio Engineering and Computer Technology	<i>( 4th Semester )</i>

## TECHNICAL SKILLS

---

Programming Languages	C/C++
Software & Tools	Bison, CMake, Flex, GDB, GoogleTest, L <sup>A</sup> T <sub>E</sub> X, SolidWorks
Version Control	Git, GitHub

## RELEVANT COURSES

---

Introduction to Industrial C++ Programming, Yadro	<i>September 2024 - Present</i>
RISC-V and test generators, Yadro	<i>February 2025 - Present</i>
Introduction to tensor compilers, Sber	<i>February 2025 - Present</i>

## PROJECTS

---

[caches](#) - Implementations of caching algorithms - LIRS caching algorithm and the Belady's algorithm

[matrix](#) - Algorithm for calculating the determinant of a square matrix

[paraCL](#) - FE & simulator for relatively simple programming c-like language

## INTERESTS

---

- Toolchain
- Theoretical mechanics
- Astronomy & Astrophysics
